

Ease of Installation and Space Saving

Gesto drum motors contain fewer installation parts compared with classical multi equipment drive systems. Thus its assembly to the conveyor structure is more simpler, faster and more practical. These facts lead to five times decrease in assembly costs both for end users and OEMs.

Conventional Drive System Parts:

1- Standard Electric Motor
2-Electric Motor Table
3-Electric Motor Cover
4-Coupling / Pulley
5-Chain / V Belt

6-Gear Reducer
7-Belt Stretcher
8-Bearing Housings, Bearings and
Seals
9-Drum

Conventional multi equipment drive systems contain 9 main sub assembly parts, however Gesto drum motors consists of only a steel drum shell and two fixing brackets.
